BPS Motto and Mission

Motto:

Believe, Persevere, Succeed

Mission:

We nurture students to believe in themselves as learners who persevere through challenge. Our students graduate with kind, compassionate hearts, ready to be positive changemakers in our community and world. BPS graduates understand that our school values are fundamental human values. They leave our school as curious, confident, life-long, open-minded learners.

As educators we respect the powerful impact we have on our students' learning. We feel a sense of belonging and community towards one another and our school. We teach in a way that exemplifies best practice with a commitment to continuous self and student learning. We accept responsibility for upholding our collective professional values.

As a school community of learners we:

- believe in providing the opportunity for all to strive to be their personal best in learning.

- respect and celebrate the diversity of all cultures, identities and abilities in our community

- provide opportunities for student voice, choice, action and encourage our students to be confident and successful learners.

- work together to foster a love of learning to produce students who are independent, confident and engaged problem solvers with high self-worth.

- are positive about the school experience.

My Name:
Can I agree to live with this statement?
Can I agree to support it public and private?
Will I?
